A gentleman called at the Bulletin office recently and stated that the destruction of birds on neighboring islands by the Japanese is nothing compared with what Japanese in the vicinity of Waiwahu on this island are doing. He said there are two Japanese fishing companies of four men each that are fishing with mosquito nets. It is claimed that during the month of April these companies made \$5,000 each. When asked to give his name the man said he did not want to do the kicking, but native fishermen, friends or his in the locality, were complaining and wanted someone to kick for them. If two fishing hula can make \$5,000 a month, plantations will soon take second place as money-makers.

That's where we have the spectacle business—at our fingers' ends. That's the secret of our success; just a little ahead, never behind.

In this day of defective sight, neither young nor old should wear glasses unless fitted by one who has all the details of the science right at his fingers' ends.

We are thoroughly familiar with the eye and its needs.
